

BITRODESK
WHITE PAPER
WORLDS BEST COMMUNITY BASED OTC TO FIAT EXCHANGE

BACKGROUND

On October 31st, 2008, Satoshi Nakamoto presented a white paper introducing Bitcoin (BTC) – BTC: A Digital Cash System in a Peer-to-Peer Network, heralding the birth of a decentralized network facilitating value exchange. Subsequently, the digital assets realm constructed on blockchain technology has flourished, commanding a market value surpassing 2 trillion dollars and expanding its influence.

In the early days of this sector, numerous projects faced challenges in implementation, while the rising demand for digital asset issuance was predominantly driven by trading activities. As a result, exchanges emerged as crucial intermediary platforms, meeting diverse investment needs and playing a vital role in the industry's swift development. Despite this progress, this era was not without significant setbacks. In a regulatory environment lacking strict oversight, the economic model at the time spun out of control. Monopolistic competition created an atmosphere where investors were often exposed to covert activities, misappropriation, and security risks, all while being left out of the benefits of industry advancement.

As the industry entered its second phase, new trading platforms emerged alongside notable competitors. Established exchanges faced a crucial decision point, prompting a significant overhaul to ensure fair distribution of industry benefits among peers. The key challenge was to navigate market dynamics by implementing comprehensive reforms in token economics, governance mechanisms, and ecosystem development. Acknowledging these challenges as industry pioneers, the BITRO team embarked on a mission driven by duty and responsibility. Leveraging our expertise in trading platforms and deep market insights, we proudly introduced the BITRO trading platform. This platform is set to serve as the cornerstone for all projects within WEALTH BUILDERS NATION (WBN) in the long term.

• ABOUT BITRODESK

BITRODESK Exchange, established by experienced quantitative trading teams from Africa, Wall St., Colombia, Dubai, UAE, Europe, and Japan, alongside blockchain experts in a decentralized and self-organizing manner, functions as a platform for trading and circulating blockchain-based assets. Dedicated to creating a leading global trading platform for blockchain assets, BTRC offers users secure, convenient, and intelligent asset circulation services by consolidating high-quality blockchain assets worldwide and integrating advanced security technology.

- BTRC currently offers diverse trading options, including token-to-token, OTC, contract, PoS Pool, and wealth management products.
- All profits from trading fees are used to buy back and burn BITRO, the platform's token, until only 10 million tokens are left. The total BITRO supply is 50 million, with more than 5 million tokens already repurchased and burned.
- Additionally, the BITRO token serves as proof of rights for the BITRODESK community, granting holders the ability to participate in community event voting, team elections, and more.
- By actively engaging in empowerment initiatives, BITRODESK aims to maximize the ecological advantages of a self-governing community.

As we kicked off 2024, CoinMarketCap presented a comprehensive analysis of the crypto market for January 2024. This eventful month marked a historic milestone for the crypto industry, with the U.S. SEC approving spot Bitcoin ETFs. The report also probes deeper, exploring key trends and metrics from 2023, offering insightful analysis into top-performing tokens, leading crypto exchanges, DeFi protocols, Layer-1 and Layer-2 networks, NFTs, and more.

In the rapidly expanding secondary market for digital assets, there are currently over 600 digital asset trading platforms and more than 50 million active investing groups globally, with over 580 million crypto holders. Since December 2023, according to Coinmarketcap, the daily trading volume in the global digital asset market has surpassed \$80 billion, with a total market capitalization exceeding \$2.34 trillion.

Despite being an emerging financial asset, blockchain digital assets have not yet attracted mainstream financial institutions due to their short history and limited market size. Consequently, there are only a few financial asset trading platforms offering services to digital asset users post BITCOIN ETF approval. However, some major trading platforms, although involved in traditional financial transactions, lack user-friendly technical architectures, resulting in losses and asset misappropriation, especially among new users. These platforms fail to meet the requirements of professional financial systems, particularly in efficiently handling concurrent transactions, leading to failures during transaction peaks and financial losses for customers. Moreover, many trading platforms exhibit imperfect business flow processing, lack essential functions, and do not fully cater to investors' needs.

The isolation of users on individual platforms and the absence of inter-platform connections limit market depth, hindering a seamless transaction experience for investors. Notably, the custody of blockchain digital assets lacks a trusted third party, with all client assets being held by the platforms, necessitating stringent system security measures to prevent attacks by malicious entities. Breaches in security links could result in substantial losses for platforms, as evidenced by several exchanges being hacked, leading to users losing their assets. The recent surge in Bitcoin's value has attracted serious investors globally, indicating a growing interest in digital assets as viable investments.

Investment opportunities extend beyond Bitcoin, with alternative digital assets such as MATIC, BNB and Ethereum attracting investors' interest. Additionally, startups are leveraging the blockchain trend by introducing new digital assets to secure project funding, leading to considerable achievements. This trend highlights the potential for blockchain digital assets to shape a promising future as increased market resources flow into this growing sector.

Our goal is to utilize our knowledge and resources to create a globally interconnected trading platform. This platform will provide secure, dependable, and professional services to investors and entrepreneurs worldwide. Our objective is to support the ongoing growth and advancement of the blockchain sector, aiding in its transformation into a mainstream financial environment. Additionally, we seek to enhance accessibility to crypto assets in the real world through our robust API integrations.

As a globally integrated trading platform, Bitrodesk is well-positioned to offer a wide range of system functionalities, including spot trading, futures contract trading, over-the-counter trading, whole-network trading, decentralized trading, and crypto-to-fiat trading options. Serving the diverse needs of many investors, Bitrodesk emphasizes robust security measures and a reliable infrastructure to ensure a safe trading environment. Additionally, Bitrodesk's innovative online trading model effectively matches the market depth of major global exchanges, further boosting liquidity levels. Through its whole-network trading system, Bitrodesk aims to establish itself as a key liquidity provider for digital assets worldwide.

- **FEATURES OF OUR TRADING PLATFORM**

Token-based Rebates to Achieve Benefit Sharing

Within the BITRODESK ecosystem, BTRC holders have access to various benefits and privileges such as BTRC appreciation, asset value growth, rebates on platform revenue, governance participation, voting rights, and more. The BITRODESK Platform implements a buy-back and burn mechanism to reduce the number of BTRC TOKENS, enhancing the experience for BITRO holders within the BITRODESK community.

- **One-stop service**

By integrating top global industry resources, BTRC aims to develop a comprehensive digital asset circulation platform. Leveraging its extensive industry expertise, BTRC offers project parties and investors a range of services including token circulation, trading, and time deposit, ensuring efficient and secure digital asset circulation on the platform.

- **SECURITY**

The BITRODESK technical team has developed an advanced security risk control system and an anti-DDOS system using their vast expertise in the digital asset sector. By implementing security measures like multi-signature, offline signature, and layered architecture, BTRC safeguards its digital assets in a cold wallet, ensuring the utmost protection for every investor.

- **Super Nodes, Strong Community Support**

BITRODESK, functioning as a supportive ecosystem, fuels blockchain enthusiasts with the dynamic energy produced by blockchain technology. It consolidates the contributions of all nodes to foster comprehensive ecological development, paving the way for new strategies to align with market trends. This initiative aims to propel the sustainable growth of the blockchain industry in harmony with a robust community consensus.

• BITRODESK ASSET SCREENING STANDARDS

In the fast-evolving blockchain industry, distinguishing between projects driven by excessive funding and those offering genuine value has become BITRODESK's primary focus when selecting tokens, ensuring the protection of community users.

Drawing from the historical lessons of the Internet boom, it is evident that the majority of start-ups are bound to fail, with only a few surviving in the long run.

Survival rates in the blockchain sector are notably low. Following the last two bull runs, five of the top 20 digital currencies have plummeted to zero, while others are on the brink of collapse. Notably, Bitcoin and ETH have emerged as resilient survivors, boasting significant growth of 178% and 118% respectively in the past year. Their remarkable overall increase of 100,653,200.89% and 120,965.97% respectively has positioned them as leaders in the current cycle. The investment logic in blockchain mirrors that of the Internet, emphasizing the importance of enduring market fluctuations to emerge as successful projects. Bitrodesk has forged strong partnerships with reputable rating agencies, ensuring that projects undergo rigorous screening before launch, in line with established criteria. Additionally, a dedicated team monitors project and community progress, ensuring smooth project launches.

Future plans involve refining the project screening process based on community votes, allowing investors to engage early on and exercise their investment rights. By introducing a trinity framework involving the platform, investors, and rating agencies, the goal is to efficiently bring high-quality projects to investors.

- **Introduction to Bitrodesk Technical Team**

The core members of BITRODESK's technical team have extensive backgrounds from prominent domestic IT and cryptocurrency enterprises like Skyworld, Binance, and Visa. With an average of over 14 years of experience, they possess a strong technical foundation.

In 2013, the team ventured into blockchain technology development. Initially, the core members were part of TILYCOIN's founding partners and the Binancesmartchain mining pool, a renowned mining pool domestically. They established the first SC mining pool in Dubai and ranked among the top 10 global BNB mining pools in 2022.

Additionally, the team contributed to the largest P2P market in Colombia, yielding consistent returns. Moreover, they excelled in technology implementation, such as investing over \$100,000 in Matics on the latest Metacloudx liquidity mining protocol. Two years ago, they achieved sales exceeding \$11 million in an experimental project, resulting in nearly a tenfold increase in profits.

Currently, leveraging their unique attributes and technical expertise, the team is focused on developing the BITRODESK Exchange. Their goal is to establish an exchange with exceptional performance and user experience, aiming to bring a fresh perspective to the realm of cryptocurrencies.

- **BITRO COIN (BTRC)**

What is BTRC?

Bitro coin represents the rights and interests of the BITRODESK trading platform. With a fixed total circulation of 50 MILLION BTRC, which will never increase.

Holders of BTRC can benefit from various rights and interests, such as asset appreciation, revenue rebates, governance, voting, and more. To acquire BTRC, you can purchase them from private sales, on the BITRODESK platform or other platforms where BTRC is available.

- **BITRO COIN RIGHTS & INTRESTS**

As the advocate for the rights and interests of the BITRODESK trading platform, BTRC stands as the foundation of the platform's ecological growth and the validation of circulating encrypted digital rights and interests.

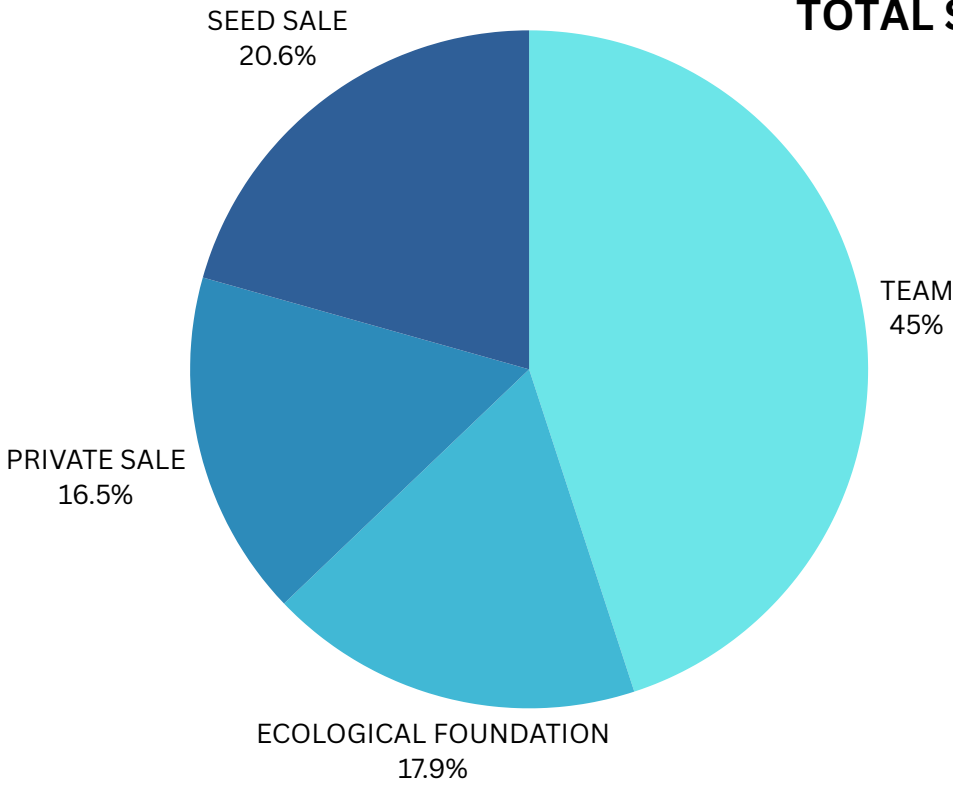

RIGHTS AND INTERESTS	DESCRIPTION OF RIGHTS AND INTERESTS
BUY BACK AND BURN	BITRODESK will use 100% profit from trading fees to buy back and burn BTRC each month.

- **BUY BACK AND BURN MECHANISM**

Starting April 1, 2024, the BITRODESK community members voted to eliminate the profit-sharing mechanism for BTRC. Instead, they decided to allocate 80% of the trading fees from the private sale to repurchase and burn BTRC every month.

• BTRC DISTRIBUTION MECHANISM

COIN NAME • BITRO COIN
TICKER • BTRC
TOTAL SUPPLY • 50,000,000

%	AMOUNT BITRO COIN	PARTICIPANT
45%	22,500,000	FOUNDING TEAM
17.9%	8,950,000	ECOLOGICAL FOUNDATION
16.5%	8,250,000	PRIVATE SALE
20.6%	10,,300,000	SEED SALE

The Significance of the BTRC Brand

The Bitrodesk Exchange brand embodies precision and sophistication with its 13-edged Diamond shaped Letter "B" logo, symbolizing reliability and innovation. Its signature purple hue represents creativity and uniqueness, reflecting a forward-thinking vision in the cryptocurrency exchange space. Overall, the design communicates a blend of reliability and forward-thinking vision, fitting for an exchange token aiming to stand out in a competitive market.

- **RELEASE MECHANISM**

The ICO will take place in MATIC on various platforms worldwide.

- **ICO Schedule:**

All times mentioned below are in Gulf Standard Time (GST), UTC+4 hours.

DATE	TASK
2024/03/04	BITRODESK project commencement confirmed.
2024/03/07	The initial draft of the white paper has been finished and shared with potential angel investors.
2024/03/14	Announcement of the Bitrodesk ICO plan and unveil the white paper to the public.
2024/04/01	ICO starts (platform will be available soon)
2024/04/14	Bitrodesk.com version 0.2 is now live, and all trading commences.
2024/04/22	ICO , finishes , when ever all coins are sold out

The ICO will begin at 1PM on April 1st, allowing investors to purchase tokens on a first-come, first-served basis until all 10,000,000 tokens are sold out.

As each new phase is unlocked, the coin price will increase.

Investors can expect to receive BTRC within 5-10 working days immediately after the ICO ends. See the detailed schedule below:

ICO PHASE	1ST WEEK	2ND WEEK	3RD WEEK
GST/GMT +4	1:00 PM APRIL 1ST- 1:00 PM APRIL 7TH	1:00 PM APRIL 7TH - 1:00 PM APRIL 14TH	1:00 PM APRIL 14TH - 1:00 PM APRIL 22
100, MATIC	2500 BTRC	2300 BTRC	2000 BTRC

Private sale: 16.5% of the total supply which is 8,250,000 BTRC will be available for Angel investors and private sale holders at a rate almost 5 -10 times lesser than the market price , the minimum buy will be 300 matic and above for private holders and 10,000 Matic and above for angel investors. Angel investors will receive at a rate 5X lesser than private holders .

Seed Sale:

10% of the total supply, which amounts to 10,300,000 BTRC, will be available at a rate of 1 matic = 25 BTRC.

20% of this will be allocated for rewards.

Initially, 30% of the principal will be released, and the remaining 70% of the locked principal and rewards will be distributed monthly over 7 months.

Ecological Release:

- BTRC Ecological Foundation will create a budget based on operational needs and decide on releases through voting.
- The budgeted amount will be released in stages to meet actual demand.

Team Release:

- The full release is expected by January 2027.
- BITRO will conduct a poll in December 2023 to determine the release method and pace during its transition to a new blockchain.

- **BTRC VESTING PLAN FOR TEAM**

Innitial release: 25% (5,625,000)

AFTER 1 YEAR	25% (5,625,000)
AFTER 2 YEAR	25% (5,625,000)
AFTER 3 YEAR	25% (5,625,000)

Funds Usage

40% of the funds will go towards developing the Bitrodesk platform and making enhancements to the system. This allocation covers team recruitment, training, and the development budget.

30% of the funds will be allocated to Bitrodesk branding and marketing efforts, which involve ongoing promotion and education about Bitrodesk and blockchain advancements through industry channels. Another portion of the budget will be designated for diverse advertising activities aimed at boosting Bitrodesk's visibility among investors and attracting engaged users to the platform.

15% of the sales will be set aside as a reserve to handle any unforeseen emergencies or unexpected situations that may arise.

10% of the funds will be set aside as back up liquidity for all other projects under Wealth Builders Nation ,and the same scenario will occur each time WBN launches a new product there by creating a robust ecosystem

Q2, 2025

Establishment of Bitro project incubation labs and Bitro exchange ecosystem

Q1, 2025

Launch of financial derivatives based on digital currency, futures, index funds etc

Q4 2024

Launch of C2C, fiat trading and contract trading

AUGUST, 2024

Launch of minting incentive mechanism and liquidity pools.

JUNE, 2024

App launch with crypto-fiat functionalities

APRIL 2024

Launch of new web version, public beta and official ICO

MARCH 2024

The official launch of transactions including private sales, assessing digital assets based on the Bitrodesk asset evaluation system to prepare them for listing and circulation.

- **Disclaimer**

This document serves as an informational guide and does not offer opinions on the exchange of BITRODESK for payment or participation in platform investment. Please note that the information provided should not be considered as investment advice, and users intending to invest should have a clear understanding of the risks associated with BTRC.

In the current landscape, the regulation of blockchain projects and digital token-based financing methods remains unclear in some countries, posing a potential for participant loss due to changes in laws or policies. Investors making independent decisions are encouraged to fully comprehend and accept the risks, including policy, regulatory, compliance, business cycle, network security, technology development, management, digital currency industry, price volatility, and other unspecified risks.

BTRC, being a digital asset, involves high uncertainty in transactions. The field of digital asset trading lacks robust supervision, leading to hidden risks such as significant fluctuations, continuous trading, and involvement by bankers. Investors are advised to thoughtfully select their investment methods based on their personal situation and experience.

For citizens residing in regulated countries like the UAE, China, or the United States, it is recommended not to invest. In the unfortunate event of project failure due to market demand, technical issues, or other uncontrollable factors, the recovery of invested assets, whether in ETH, POLYGON, or other Tokens, may not be possible. Your understanding and consideration of these aspects are appreciated.
